

HERBAL EXTRACT

FRANKINCENSE

FRANKINCENSE IS A HARDENED GUM-LIKE MATERIAL (RESIN) THAT COMES FROM THE TRUNK OF THE BOSWELLIA TREE. PEOPLE USE ITS OIL ON THE SKIN AND IN AROMATHERAPY. FRANKINCENSE OIL KILLS VARIOUS TYPES OF BACTERIA AND FUNGI (YEASTS). IT IS ALSO COMMONLY USED AS A FRAGRANCE IN SOAPS, LOTIONS, AND PERFUMES.

Frankincense resin is obtained from trees of the genus Boswellia (family Burseraceae). Incisions are made in the trunks of the trees to produce exuded gum, which appears as milk like resin. The resin hardens into orange-brown gum resin known as frankincense. There are numerous species and varieties of frankincense trees, including Boswellia serrata in India, Boswellia carteri in East Africa and China, Boswellia frereana in Somalia, and Boswellia sacra in Arabia, each producing a slightly different type of resin. Differences in soil and climate create more diversity in the resins, even within the same species. The aroma from these resins is valued for its presumed healing properties and superior qualities for religious rituals since the time of the ancient Egyptians, and has been used in incense, fumigants, and as a fixative in perfumes.

OIL

Frankincense Extract

What is Extract?

Pure frankincense extract is a product derived from frankincense using state of the art CO2 Extraction supercritical technology and is used in the pharmaceutical, cosmetic, health and adhesive industries.

Frankincense healing properties:

Health benefits:

Memory Improvement

Anti-cancer properties

Treatment of respiratory diseases

Increases male fertility

Mitigates the symptoms of premenstrual syndrome

Improves tooth and gum tissue health

Aids weight loss and body detoxification

Emollient and aids skin repair

Frankincense properties for cosmetics Industries:

Eliminates hair loss and strengthens hair

Removes acne and clears skin

skin rejuvenation

Skin oil balance

Skin oil cleansing toner

Prevention and reduction of skin ulcers

Acne scar treatment

Treatment of sunburn

Scent for perfumery

Advantages of using frankincense extract and essential oil as an alternative to frankincense:

- Presence of effective compounds in much higher concentrations in equivalent volumes
- Absence of contamination due to Aspergillus fungus activity and production
- Aflatoxin toxin by them easier storage and transport conditions
- Absence of impurities and heavy metal elements
- Reduces potential of microbial contamination and increases shelf life of the product its used in
- Increases quality and nutritional value of products its used it
